

SACHIN

Cybersecurity | Security & Network Analysis

+91 9878700434 | sachin.dhawan1313@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Cybersecurity student with hands-on experience in network traffic analysis, vulnerability assessment, security tooling, and Python-based projects. Skilled in Wireshark and Nmap for traffic inspection and reconnaissance, with working knowledge of TCP/IP, Linux, log analysis, and security fundamentals. Seeking an entry-level cybersecurity opportunity to apply practical security and threat-analysis skills.

SKILLS

- **Security & Monitoring:** Log analysis, alert-triage fundamentals, incident-response basics, vulnerability assessment
 - **Security Tools:** Wireshark, Nmap, Kali Linux, Burp Suite (learning), Git
 - **Networking:** TCP/IP, OSI Model, network security fundamentals, protocol analysis
 - **Programming/Scripting:** Python (security tooling & automation), SQL (basic queries)
 - **Security Concepts:** Credential security, authentication/access control, threat identification
 - **Other:** Linux command line, problem solving, critical thinking, attention to detail
-

CERTIFICATIONS

- Ethical Hacking Certification | Zaid Sabih, Udemy | 2025
 - Cyber Security with AI - Internshala Trainings | 2026
 - Offensive Security Operations - Cybrary | 2026
-

PROJECTS

Password Security Analyzer | Python, Cybersecurity

- Developed a Python-based Password Security Analyzer to evaluate password strength across six security parameters, gaining practical knowledge of credential security, authentication, and risk assessment.

Face Lock System - Computer Vision Project

- Developed a face recognition-based authentication system using Python, OpenCV, Flask, and face_recognition/dlib for real-time facial detection and identity verification. Implemented face enrollment, facial matching, and authentication logic for secure application access control.

Hardware Project Developer | Self-Directed

- Developed multiple hardware projects including Bluetooth RC Car, Weather Monitoring, Health Monitoring, and Radar Systems.
 - Worked on Smart City and IoT-based solutions using sensors, microcontrollers, and automation.
 - Built a laser-based security system for basic intrusion detection.
 - Integrated Arduino, HC-05 Bluetooth, sensors, motors, and motor drivers into functional prototypes.
 - Gained hands-on experience in Arduino programming, IoT, embedded systems, sensor integration, and hardware troubleshooting.
-

HANDS-ON EXPERIENCE

Self-Directed Cybersecurity Projects

- Developed cybersecurity projects using Python, Kali Linux, Nmap, and Wireshark to build practical security and networking skills.
 - Applied security concepts through credential analysis, biometric authentication, network reconnaissance, and packet analysis.
 - Maintained project code and documentation through Git/GitHu
-

EDUCATION

B.Tech - Electronics and Computer Engineering | Guru Nanak Dev University, Amritsar | 2023-2027
