

SACHIN

SOC Analyst | Security Monitoring & Incident Response

+91 9878700434 | sachin.dhawan1313@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Cybersecurity student with hands-on experience in network traffic analysis, vulnerability assessment, and security tool development. Skilled in Wireshark and Nmap for traffic inspection and reconnaissance, with working knowledge of TCP/IP, log-based analysis, and security fundamentals. Seeking a SOC Analyst role to apply threat-detection and monitoring skills in a real-time security operations environment.

SKILLS

- SOC / Monitoring: Log analysis, alert triage fundamentals, incident response basics, vulnerability assessment
- Security Tools: Wireshark (packet/traffic analysis), Nmap (network scanning/recon), Kali Linux, Burp Suite (learning), Git
- Networking: TCP/IP, OSI Model, network security fundamentals, protocol analysis
- Programming/Scripting: Python (security tooling & automation), SQL (basic queries)
- Concepts: Password/credential security analysis, biometric & access-control authentication, threat identification
- Soft Skills: Problem solving, critical thinking, attention to detail, team collaboration

CERTIFICATIONS

- Ethical Hacking Certification | Zaid Sabih, Udemy | 2025
- Cyber Security with AI - Internshala Trainings | 2026
- Offensive Security Operations - Cybrary | 2026

PROJECTS

Password Security Analyzer | Python, Cybersecurity

- Built a Python tool that evaluates credential strength across 6 security parameters, a core control area for SOC identity/access monitoring.
- Implemented a scoring/alerting algorithm delivering real-time feedback, mirroring rule-based detection logic used in SOC alerting.
- Achieved 90% accuracy in flagging weak/high-risk passwords across test scenarios.

Face Lock System - Computer Vision Project

- Developed a facial-recognition authentication system to enforce access control, applying biometric security and identity-verification concepts relevant to SOC access monitoring.
- Implemented facial detection and matching logic for real-time authentication decisions.

Hardware Project Developer | Self-Directed

- Designed and built 3+ hardware projects including Bluetooth RC car and sensor-based systems
- Integrated microcontrollers with Bluetooth modules, motors, and sensors for functional prototypes.

EXPERIENCE

- Developed cybersecurity projects using Python, Kali Linux, Nmap, and Wireshark.
- Built a Password Security Analyzer to evaluate password strength and security parameters.
- Developed a Face Lock System for secure authentication using facial recognition.
- Designed and built hardware projects including a Bluetooth-controlled Arduino RC car.
- Integrated Arduino, HC-05 Bluetooth, sensors, motors, and motor drivers into functional prototypes.

EDUCATION

B.Tech- Electronics and Computer Engineering
(From Guru Nanak Dev University Amritsar)

2023-2027

- Relevant Coursework: Network Security, Operating Systems, Computer Networks
